GLOBAL MANUFACTURING LEADERSHIP AWARDS

With the exponentially evolving landscape of Manufacturing from a physical factory to a smart factory, it has been the engine of every successful economy across the globe. With Government of India's initiatives like "Make in India" and the current corporate tax reduction, India is all set to achieve smart manufacturing supremacy. India continues to be among the fastest growing economies globally, and manufacturing has the potential to emerge as one of the highest growth sectors in India. India has a massive workforce, an emerging supply base, and access to several natural resources

needed in production. The Indian Government, in line with its "Make in India" objective, has set an ambitious target of increasing the contribution of manufacturing output to 25% of gross domestic product (GDP) by 2025. To capture the available opportunity, India's manufacturing sector will have to improve its efficiency dramatically.

The Event will serve as a platform for manufacturers and operators involved throughout the associated supply chains from across the Global to gather to discuss pressing issues facing the industry. It is now firmly established as a 'must-attend' annual event, which successfully connects key stakeholders across the full spectrum of Global manufacturing, including aerospace, automotive, chemical & pharmaceutical, construction, defense, electronics, energy, food & drink, nuclear, plastics, security, steel, space and textiles etc.

The Awards is scheduled on **15th February, 2024 at Taj Lands End, Mumbai**. This Awards will bring the best Industry Professionals & Organizations who have made outstanding contribution. The Awards aim to reward the best in the industry & enhance reputations.

AUTO ANCILLARY AWARD CATEGORIES:

- Innovative E-Mobility Solution - Component Supplier of the year
- Green Practice of the year
- Components Shopfloor Management of the year
- Auto Component Exporter of the year
- Auto Ancillary of the year
- Auto Components Business Leader of the year
- Auto Component of the year
- Zero Defect Supplies Award
- Future Ready Factory Award
- Smart Factory Award
- Excellence in New Product Design

- Plastic
- Stationery
- FMCG
- Cement
- Chemical
- Electronics

CHEMICAL INDUSTRY LEADERSHIP AWARDS

The Chemical industry is a vast industry that incorporates all different types of product producing industries whose generation is based on heavy use of chemicals. Usually, industries that are involved with industrial chemical generation are broadly known as chemical industry. As per the end-products, processes or raw materials associated with chemical industries, such industry can be classified into several classes. Understanding the huge diversity of chemical producing industries, such chemical industries are usually categorized under broad categories such as inorganic and organic chemical producing industries, fertilizer industries, refining and petroleum industries, electroplating and heat treatment industries, pesticide industries, hydro generated oil/soap industries; and so on. Along with these, sometimes pharmaceutical industries, agricultural product processing industries, chemical processing/supplying industries, etc. are also regarded as specialized chemical industries. Thus, chemical industry covers a variety of industries which are focused on producing chemicals of different purposes. Understanding these varieties of classes under chemical industry is important, since such clustering helps to design suitable policies, initiatives, and interventions more readily. The variety and extent of such chemical industries are more diverse especially in the developed countries where there are adequate opportunities for industrial growth. The developing countries are not much focused on the growth of their chemical industries since they are already struggle to meet the basic demands of their citizen and to maintain a sustainable economic condition.

All these different types of industrial inclusions make the chemical industry strategic incorporating investment and supply chain management for multiple different types of industries. Professionals with precision knowledge & skills are involved in the chemical industry including chemical engineers, chemists and lab technicians.

The Awards is scheduled on **15th February, 2024 at Taj Lands End, Mumbai**. This Awards will bring the best Industry Professionals & Organizations who have made outstanding contribution. The Awards aim to reward the best in the industry & enhance reputations.

- The innovative Leader Award
- Lifetime Achievement Award

EXPORTS LEADERSHIP AWARDS

Exports are goods and services that are produced in one country and sold to buyers in another. Many firms begin their global expansion as exporters and only later switch to another mode for serving a foreign market. Exports are one of the oldest forms of economic transfer and occur on a large scale between nations. Exporting can increase sales and profits if they reach new markets, and they may even present an opportunity to capture significant global market share. Companies that export heavily are typically exposed to a higher degree of financial risk. The Awards is scheduled on **15th February, 2024 at Taj Lands End, Mumbai**. This Awards will bring the best industry Professionals & Organizations who have made outstanding contribution. The Awards aim to reward the best in the industry & enhance reputations.
